**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 6-8, 13-14, 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson et al.

Anderson et al. discloses an ophthalmoscope device comprising laser light sources which produce a white light for scanning upon an eye and then obtaining a reflected image. Rotating prism (44) is provided in the light path for shifting the light line. A laser source is considered to be a "punctiform" source.

3. Claims 1-8, 17 are rejected under 35 U.S.C. 102(e) as being anticipated by McGettigan et al.

McGettigan et al. disclose an optical system comprising:

a light source (84) with a filament for illuminating objects (134, 136);

a prism (106) arranged between the light source and the objects as part of a projection system including lens (108).

Prism having plane parallel surfaces forming a regular cubical polygon with 4 corners shifts the light beam as the prism is rotated. As noted in column 8 Lines 1-5 the direction of rotation may be in either direction.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over McGettigan et al.

McGettigan et al. disclose the invention substantially as claimed but do not specify the means used for rotation of the prism.

Electrical motor means are well known means for driving moving parts. Since the driving of the prism is automatic it would have been obvious to one skilled in the art at the time of the invention to utilize such motor means to drive the prism of McGettigan et al.

***Allowable Subject Matter***

6. Claims 9, 11-12, 15-16, 18-20, 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
